Completed Contracts:

Bourbonnais Maint. Facility
 Helmar Lutheran Church
 St. Mary's Church

EARTH DAY APRIL 22, 2010

Celebrating it's 40th year, Earth Day 2010 continues to encourage and inspire world wide environmental awareness.

Founded by U.S. Senator Gaylord Nelson in 1970. The movement was originally to be named the "National Environmental Teach-In". Overwhelmed with press coverage the movement quickly earned the moniker "Earth Day".

Today the movement encourages millions around the world to make a commitment to sustainability.

How will you support "Earth Day"?

Northern Sales Region Advisory Board: Varco Pruden

Jerry Meister joins Varco Pruden's 2010 Northern Sales Region Advisory Board.

Next month, Jerry will travel to Detroit to participate in "round table" discussions with other key VP's Builders to evaluate areas of operations including sales, estimating, customer service and manufacturing responsibilities.

If you have an idea you'd like Jerry to share, please call @ 630-551-7272.

LUNCH & LEARN SPOTLIGHT

Engineers, architects and builders from the Chicago land area attended a seminar and luncheon on St. Patrick's day hosted by Area Erectors, Inc.

Representatives from Metl-Span, Varco Pruden Buildings and The Blue Book were on hand to provide product demonstrations, information and discuss topics that included steel component application for today's current pre-engineered steel buildings industry as well as the trend toward LEED certification programs.

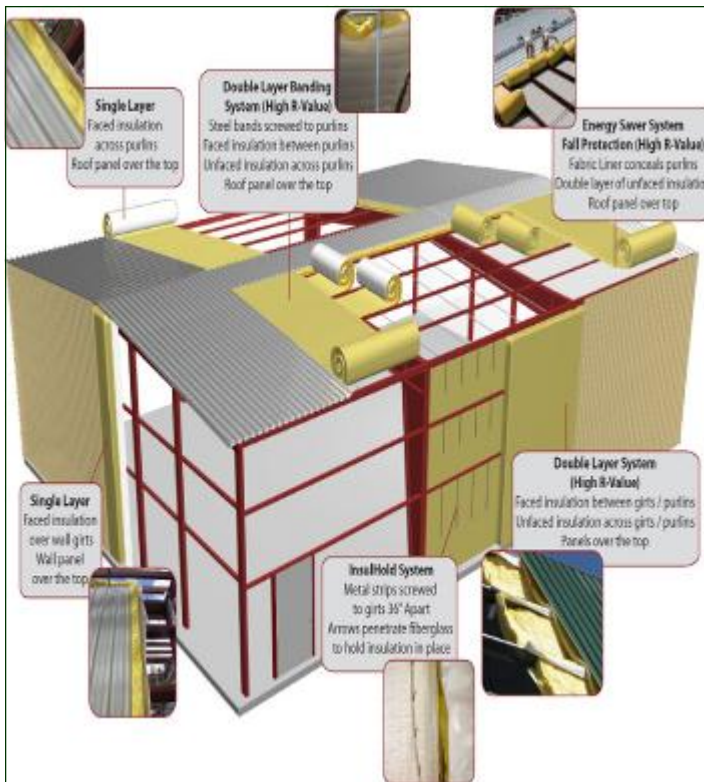

We would like to once again extend our sincere appreciation to Tom Lienhardt, District Sales Manager; Varco Pruden, Arnold Corbin, Pre-Engineered Building Manager; Metl-Span, Todd Brown, Regional Sales Manager; Dennis Sabia, Area Manager; and Andrea Fitch, Account Manager from the Blue Book for making this seminar a great success.

We look forward to seeing you next year!

ASHRAE 90.1-2007

The State of Illinois recently has adopted for Zone 5 the ASHRAE 90.1-2007 with Addendum G and the IECC 2009 Energy Code mandating that the minimum insulation value in the roof must meet a "U" value (installed value) of 0.055, the reciprocal of which is an "R" value of 18.2. It takes two layers of 4" fiberglass blanket insulation in the roof to meet that standard. The minimum insulation value in the walls must meet a "U" value (installed value) of 0.69 the reciprocal of which is an "R" value of 14.5. One layer of 6" fiberglass blanket insulation will meet that standard.

3" and 2" thick sandwich panels factory-insulated with foamed-in-place polyurethane between steel interior and exterior surfaces are available for the roof and walls of pre-engineered buildings as a standard product offering. They are viable alternates to using fiberglass insulation to meet codes while providing a smooth white interior steel surface.

TEST YOUR KNOWLEDGE

With today's constantly evolving construction industry and the movement to LEED Certification it may be difficult to keep up with newly developing organizations and standards.

You may recognize an acronym, but do you know what it represents?

TEST YOUR KNOWLEDGE

- | | |
|-----------|---------|
| 1. SPiRiT | 4. CRRC |
| 2. USGBC | 5. BECP |
| 3. FERC | 6. LEED |

Answers may be found on page 3.

VARCO PRUDEN'S FAST-TRACK PROGRAM

It's not too late to get your new building. Whether you need a small storage building or a large multi-purpose industrial facility, Varco Pruden's Fast-Track program can provide the solution. The program provides fast and efficient solutions for basic buildings at an economical cost.

Each Fast-Track building has the same high quality design, engineering and materials available in all of VP product offerings. The program allows for custom designs to multi-purpose buildings with a number of optional features. Most buildings that meet Fast-Track specifications can be manufactured and delivered to your site in as little as four to six weeks.

Call today to discuss your Fast-Tracking possibilities!

Metal Building Maintenance Services

**AREA ERECTORS, INC.
PROTECTING YOUR INVESTMENT**

- ANNUAL INSPECTION SERVICES
- PREVENTIVE MAINTENANCE
- ENERGY SAVINGS
- INCREASED PROPERTY VALUE
- IMPROVED PERFORMANCE
